Lets Brico

We have created Lets task application which provide platform to user for outsourcing household tasks. Lets Task service platform instantly connect user with skilled Tasker to help with odd-jobs and errands.

User can select what type of Task they need, by fill out quick form indicating where, when and what requirements they need, and a set of Specialists will be offered to them which best fits their needs.

Solution

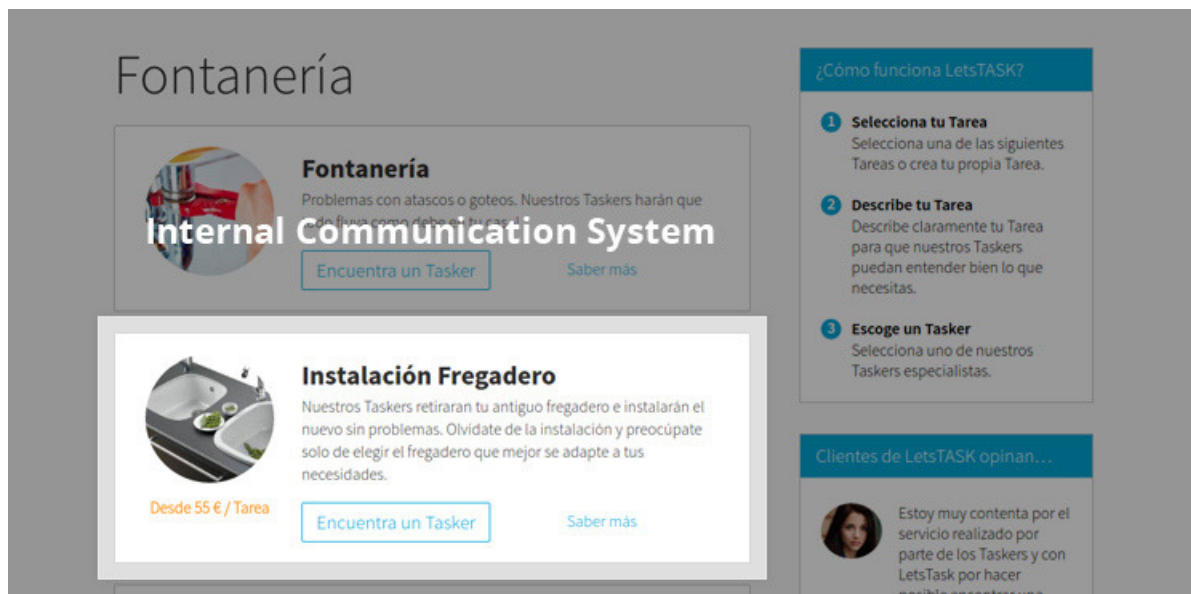

Customer

- Search for Tasker for the work
- Check Tasker profile
- Communicate with Tasker through internal messaging
- Do payment via Paypal or Credit Card to hire Tasker
- Provide rating and feedback to Tasker

Tasker

- Create Profile with task details
- When the task is successfully completed and approved by customer then after few days Tasker can send withdrawal request to LetsTask Admin
- Provide rating and feedback to customer

Admin

- Manage Tasker payment
 - Deduct commission and then offline transfer the remaining amount to Tasker's account
- Manage Customer and Tasker
- View Payment Transaction
- Communicate with Customer and Tasker
